Round wire & bars

Alloy Wire International (AWI) manufacture round wire and bars to your specification with very short lead times and, today, is one of the world's premier suppliers of 'High Performance' alloys.

We frequently discuss customers' individual requirements and, through a combination of new or existing material selection, manufacturing flexibility and our technical knowledge, we can offer a bespoke solution.

Available in:

- all alloys shown in this brochure
- 0.025 mm (.001") to 21 mm (.827")
- quantities from 3 metres to 3 tonnes
- spring temper, bright annealed, No. 1 temper, or your special temper condition
- coils, spools and bulk reels
- cut lengths of 3 mm to 3 metres

Bars with a ground surface finish also available

➤ *"Our lead times are short because we stock in excess of 85 tonnes of more than 50 alloys"*

Shaped profile wire

FLAT	SQUARE	DOUBLE D	IRREGULAR	ARC	IRREGULAR	D SHAPE	HALF ROUND	RAIL	IRREGULAR
CONVOLUTED	IRREGULAR	RECTANGLE	IRREGULAR	TRAPEZOIDAL	ANGLED	T-SHAPE	IRREGULAR	IRREGULAR	ANGLED
CHAMFERED	IRREGULAR	IRREGULAR	ANGLED	OVAL	CHANNEL	WEDGE	ANGLED	IRREGULAR	IRREGULAR

Available in:

- all alloys shown in this brochure, plus other ferrous and non-ferrous materials
- 0.4 mm (.0157") to 16 mm (.630")
- quantities from 3 metres to 3 tonnes
- hard, bright annealed or your special temper condition
- coils, spools and bulk reels
- cut lengths of 50 mm to 3 metres

If you have a special material requirement or you have a specific shape, contact us for your quote

Flat wire – Ribbon / Foil / Tape

➤ *Order quantities from 3 metres to 3 tonnes*

Available in:

- all alloys shown in this brochure, plus other ferrous and non-ferrous materials not listed
- max. width 20 mm (.787")
- min. thickness 0.025 mm (.001")
- max. ratio width: thickness = 50:1
- order quantities from 3 metres to 3 tonnes
- hard, bright annealed or special temper condition

Wire rope & strand

Another product that AWI specialise in is wire rope and strand in High Performance alloys, for use in highly corrosive or high temperature environments.

Market sectors include oil & gas technology, metering devices, chemical plants, robotics and many more. Stranded wire provides strength, but also flexibility to the overall wire.

Available in:

- all alloys shown in this brochure
- diameters of 0.4 mm (.0157") to 20 mm (.787")
- order quantities from 3 metres to 3000 metres

Available in all alloys

Monel, Hastelloy, MP35N, Inconel, Phynox etc.

➤ *Manufacturing sizes from 0.4 mm to 20 mm diameter*

Supporting the spring manufacturer

At AWI we manufacture wire for spring makers worldwide, providing unrivalled technical support in the design of a successful end product.

Our knowledge and experience within this industry enables us to produce wire with the perfect properties required for precision coiling and – when you combine this with our 98% on time delivery performance – ensures our customers are able to deliver springs to schedule with

minimal waste. This allows them to save money and grow business through their own client satisfaction.

We regularly supply just enough wire to make 2 or 3 springs for critical repairs or for testing new products.

➤ *Wire made to your spring design requirements*

Manufacturing spring wire with:

- Soap Coating
- Dead Cast
- Consistent Temper

Flat wire for spring energiser seals

➤ *Precision rolled flat wire to exacting dimensional tolerances and specific hardnesses*

AWI manufactures precision rolled flat wire to exacting mechanical and dimensional tolerances for a multitude of industries.

Manufacturers of spring energisers around the world call on us to supply their flat wire to achieve all the strict design requirements of their customer – we don't just process wire, we make it to order!

- Phynox (UNS R30003)
- Alloy MP35N
- Hastelloy
- Inconel
- Stainless Steel

Wire for precision electronics

Alloy Wire International manufacture wire for precision electronics, where dimensional tolerances and surface finish are critical. The wire can also be made to differing levels of hardness and can be supplied as the finished straight pin.

Customers using our electrical resistance wire for precision wire wound resistors can specify their round or flat wire to linear resistance. It is available with a bright or oxidised surface finish.

Controlled Expansion Alloys

- NILO® 36 (Invar[†])
- NILO® 42
- NILO® 48
- NILO® 52
- NILO® K (Kovar)

Nickel Wire

- NICKEL® 200
- NICKEL® 201
- NICKEL® 205
- NICKEL® 212
- NICKEL® 270

Beryllium-Copper CB101

Wire wound resistors

- 80/20 Nickel-Chrome (Nichrome)
- 45/55 Nickel-Copper (Constantan)
- RW 135 Iron-Chrome-Aluminium

Bright annealed wire and oxidised wire available.

Hot & cold cutting wire

Alloy Wire manufacture wire for both hot and cold cutting applications. Wire choice is made depending upon the strength, ductility and corrosion resistance required of the wire.

Our 'high strength' hot cutting wire range is used for the cutting of polystyrene (EPS)/Foam and boasts an excellent track record for working continuously on oscillating cutting frames. To achieve the best cut, adjust the temperature and cutting speed.

Our cold cutting wire, with its superior corrosion resistance and ductility, is used within the food industry for the cutting of numerous foods, including cheese.

Wire assemblies

We can supply the complete 'hot cutting' wire assembly for Industrial Foam/EPS cutting machines as an alternative to the customer buying direct from the Original Equipment Manufacturer (OEM).

Our pre-assembled 'wire assemblies' are used for speed, convenience and reducing production downtime.

Electrical resistance wire

Electrical resistance wire for heating elements, resistors and packaging machines. Hot cutting wire for foam cutting.

80/20 Ni Cr	45/55 Ni Cu	RW 41	RW 118 - RW 122 - RW 70
Also known as			
RW80, Nichrome 80, Nichrome 5, Brightray C®, Gilphy 80, Tophet A, Nikrothal 80, Cromaloy 5, Cronix 80, Chromel A	RW45, Advance, Ferry®, Eureka, Constantan, Hecnum™	Ultra High Strength Hot Cutting Wire, Foam / Polystyrene (EPS) Hot Cutting Wire	High Strength Hot Cutting Wires, Polystyrene (EPS) Hot Cutting Wires
Applications			
Heating Elements Band Heaters Resistors	Resistors Electronics	Hot Cutting, Fabrication/Line Bending	

We manufacture and stock electrical resistance wire and flat wire for heating elements, resistors, hot wire cutting and bag sealing.

Not sure what wire to use? Then buy an AWI 'TESTER PACK'

If you are unsure of the wire or ribbon size, or electrical resistance (Ohms/m) you require, you can buy a 'Tester Pack'. This provides you with a selection of different wire or ribbon stock sizes for you to try in your application.

Our resources have allowed us to develop wires for specific applications that perform even better than the standard product. Please ask us about alternatives that may be more cost effective or durable in your application.

- Element wires for heat sealers & impulse sealers
- Vacuum sealing
- 'T' profile heat sealing & impulse sealing
- Plastic bag welding
- Wire for 'L' sealers
- Hot cutting wires for foam (EPS)
- Electric heating elements
- Electrical resistors

➤ *Order quantities from
3 metres to 3 tonnes*

key advantages to you, *our customer*

Size: 0.025 mm (.001") to 21 mm (.827")

Order quantity: 3 metres to 3 tonnes

Delivery: within 3 weeks

Wire, bars & rope in over 50 alloys

Manufactured to your specification

Emergency Manufacturing Service

Industries we serve

Aerospace

Oil & Gas

Nuclear

Power generation

Chemical industries

Marine engineering

Automotive

Pharmaceuticals

Ceramics

It's more than just wire manufacturing

Founded in 1946, Alloy Wire is the world's preferred manufacturer of nickel alloy wire, providing customers with the assurance of quality, delivery and accuracy... the fundamental reasons behind our strapline...

"Manufacturing quality, delivering reliability"

We are a 100% employee owned company, an environment that creates interest, loyalty and commitment from every member of our staff.

To remain a top supplier of nickel alloy wire, AWI's main priorities are in ongoing investment in new technology, equipment and training.

Our R&D facilities enable us to constantly explore new materials and processes, in order to expand our range of products and services. Customers regularly compliment us on the technical expertise and support we provide.

➤ *Aerospace, nuclear, oil & gas – three industries that use Alloy Wire for their safety critical components to withstand high temperatures and corrosive environments*

8 things about us

FOUNDED IN
1946

Specialist UK manufacturer of Exotic Nickel Alloys, supplying a wide range of industries, including Oil & Gas, Aerospace and Nuclear

100%

100% Employee owned company

Offices all over the world, represented in 40 countries

4,000 customers on our database

2 Manufacturing facilities

Delivered to 45 countries

Alloy Wire International is a specialist manufacturer of precision cold drawn round wire, flat wire, shaped wire and wire rope in over 50 different High Performance 'Exotic' nickel alloys.

Why work with us?

Why is AWI such a successful nickel alloy wire specialist?

Firstly, we are completely owned by everyone that works here. This can be seen throughout the organisation when you walk around our factories, or you speak with any of our forty offices in four different continents. Smiles and knowledge are in abundance and each member of staff shares a desire to ensure their individual roles contribute to the positive experience of the customer.

The offer

We offer wire from 0.025 mm (.001") to 21.0 mm (.827") and currently work with 4000 customers in more than 15 sectors.

Our extensive stockholding of materials (EU/DFARS), ability to provide small batch quantities and 3 week lead times has seen us become a global leader, delivering our wire to more than 45 countries across the world.

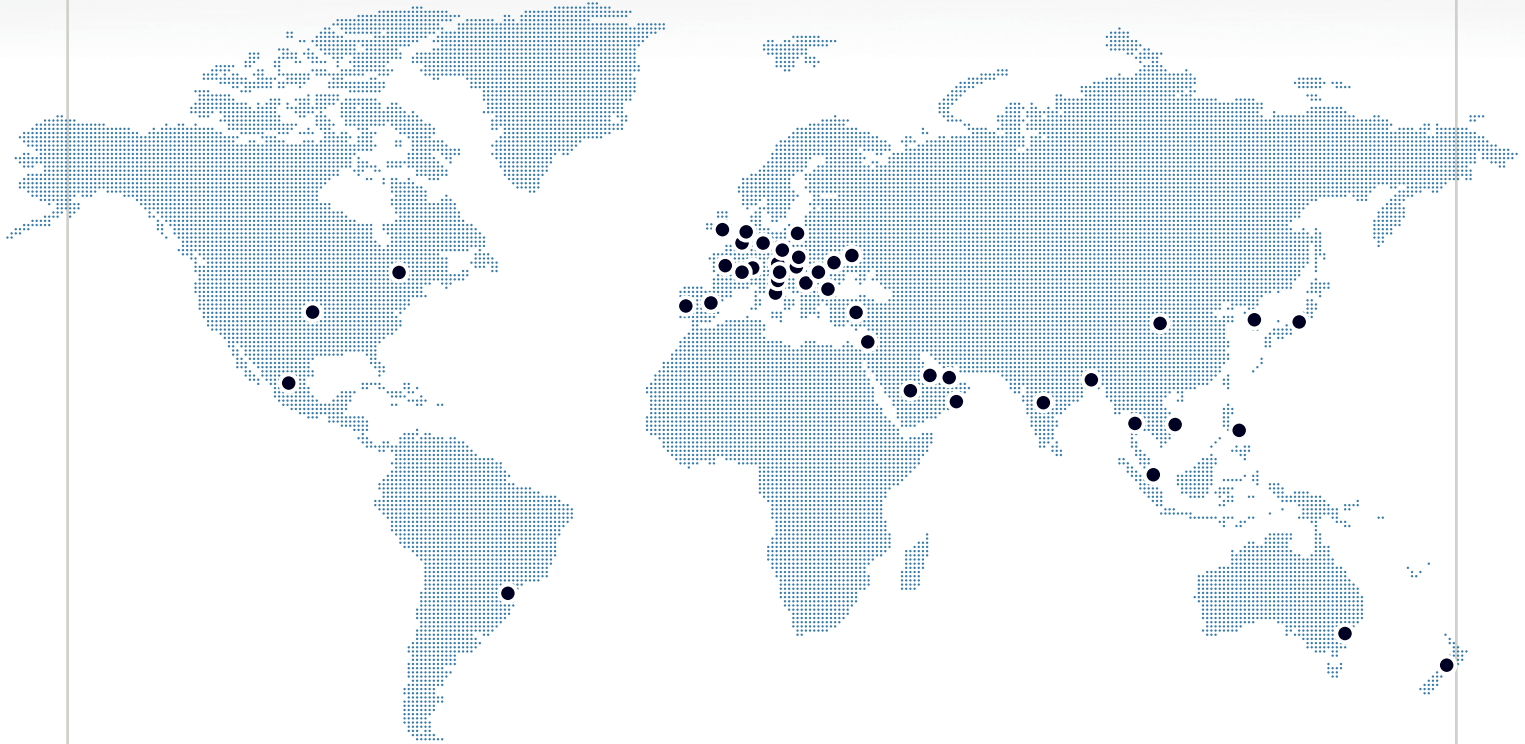

"You need a certain culture to achieve employee ownership, one of transparency, trust and togetherness... almost like a family."
Mark Venables, Managing Director

A truly global presence

100% employee owned

Alloy Wire International is 100% owned by all its employees

This means they have an invested interest in the success of the business and, therefore, are committed to giving our customers 'First Class' service. From the Annealing Technicians to the Maintenance Engineers and right through to the Shipping team, all staff are focused on completing your order on time and to specification.

An on-time quality product – with great service – helps our customers receive repeat business and creates another client loyal to Alloy Wire.

➤ *"...an on-time quality product – with great service – helps our customers receive repeat business and creates another client loyal to Alloy Wire"*

Emergency Manufacturing Service - E.M.S

Wire required urgently?

If you have an emergency situation and require your wire even faster, ask for our Emergency Manufacturing Service (E.M.S) This truly special service ensures your wire is manufactured within days and shipped to your door by the fastest route possible.

When you need your wire **manufactured fast!**

OIL & GAS

NAVAL

AUTOMOTIVE

AEROSPACE

Processing your free issue material

If you have a special grade of material that you require processing to a smaller size and to a precise specification, we can help.

We will convert your free issue wire or bars to your exact requirements. Our expertise in manufacturing small order quantities means very little material is lost in the setting up process and that's why we are entrusted to process customers high value materials, such as Silver-Palladium.

➤ *"... skill in manufacturing small order quantities means very little material is lost in the setting up process"*

Silver-Palladium

A full comprehensive service

Hands-on manufacturing

- Over 85 tonnes of stock
- A manufacturing lead time of 3 weeks
- Accepting orders from 3 metres to 3 tonnes

On-site maintenance

- Self-sufficient maintenance
- Bespoke machinery made on site
- Round and shaped wire, produced on machinery specifically designed for Alloy Wire International

➤ *Listening to our customers and manufacturing to their needs*

Bespoke manufacturing

- Emergency Manufacturing Service available (E.M.S)
- Manufacturing in coils, on spools or straight bars
- Wire produced to your specification

Multiple size ranges

- **Wire diameters:**
0.025 mm (.001") to 21.0 mm (.827")
- **Shaped profile wire:**
widths from 0.4 mm (.0157") to 16.0 mm (.630")
thickness from 0.025 mm (.001") to 6.0 mm (.236")
- **Bars and ground lengths:**
3 mm (.118") to 3 m (10 ft)

Technical support

- Providing you with technical support before and after your order, giving you confidence in your purchase and product design

The complete service

- We can re-process your free issue material
- Regular customer visits to understand your needs
- Exhibiting internationally to promote new materials and processes

Shipping

- Positive Material Identification (XRF) done before shipping as part of our 100% final inspection
- High quality bespoke packaging for secure delivery worldwide

Technical support & service

Pete Lambe - Technical Director

As approved suppliers of nickel alloys into numerous high technology products, we have a wealth of knowledge and experience in the application of the wire and its specific processing to achieve the customer's design. AWI's proficiency of the craft and science behind wire manufacturing is of the very highest level.

We offer you technical support from inception to completion and can answer common questions, such as:

- How do I heat treat?
- What is my maximum operating temperature?
- What tensile strength do I need?
- What is the specification AMS 5699?
- Which alloy for my application?

➤ *Answering your technical questions gives you confidence in your product's success*

Angus Hogarth - Sales Director

Sales team

Alloy Wire recognise that good business is all about people and service, and it is this mind-set that has made us the preferred choice for nickel alloys.

A first-class and consistent service is key to repeat business as well as the growth of new business.

Be confident doing business with us

Quality

Alloy Wire International has maintained quality approval ISO 9001 since 1991 and also achieved accreditation to the aerospace quality standard AS 9100 in April 2013. Both of these approvals are in recognition that our manufacturing and processing techniques are defined to the highest industry standards achievable.

Environmental

We are fully committed to the promotion and preservation of our environment and achieved approval to ISO 14001 in 2015. This demonstrates our commitment to exceed our moral environmental responsibility.

Health and Safety

In 2015, we were awarded the health & safety approval BS OHSAS 18001, which demonstrates the importance we place on exceeding our legal & moral obligations for the well-being and safety of all employees and visitors.

➤ *Our wire is used for various component parts in aero engines – where quality and dependability is essential*

Kevin Guest - Quality Executive

Inspection and Testing

All incoming materials are visually inspected and P.M.I (Positive Material Identification) tested before processing begins. In-process inspection is carried out at every stage of production and full traceability maintained throughout.

Final Inspection on all finished material may include:

- Dimensional Checks
- Surface Finish
- Tensile Strength
- Proof Stress
- Elongation
- Breaking Loads
- Hardness*
- Wrap Test
- Bend Test
- Torsion Test
- Post-Heat Treatment Tests
- Positive Material Identification (P.M.I)

* All hardness tests are measured in Vickers and converted using conversion tables in ASTM E140.

In addition, we have examination facilities that allow visual inspection up to 400x, linked to computer software that can produce digital or photographic images. We also have equipment that enables preparation and examination of cross sections of material and can also offer access to 3rd party external testing.

Tolerances

Here are our standard tolerances.
If you require tighter tolerances, please ask.

Wire Diameter Tolerances

45/55 Ni Cu Electrical Resistance Wire

Chemical Composition			Designations	Typical Applications
Element	Min %	Max %	W.Nr. 2.0842 AWS 181	Power resistors, shunts, thermocouples and wire-wound precision resistors having operating temperatures up to 400 °C (750 °F)
C	-	0.10		
Si	-	0.50		
Mn	-	1.00		
Fe	-	1.00		
Cu	55.00 nominal			
Ni	BAL			

Density	8.89 g/cm ³	0.321 lb/in ³
Electrical Resistivity at 20 °C	49 microhm • cm	295 ohm • Circ • mil/ft
Maximum Operating Temperature	400 °C	750 °F
Melting Point	1270 °C	2320 °F
Coefficient of Expansion	14.7 µm/m °C (20 – 100 °C)	8.17 x 10 ⁻⁶ in/in °F (70 – 212 °F)

45/55 NiCu changes little in electrical resistance as temperature increases. It has a temperature-resistance factor of +0.00003/°C in the 20 – 100 °C range.

RW 41 Ultra High Strength Hot Cutting Wire

Key Features	Typical Applications
Exceptional strength at elevated temperatures and is the highest performing hot cutting wire we offer.	Production lines cutting foam polystyrene (EPS), thermal laminate materials etc. Excellent track record for working continuously and on oscillating cutting frames.

Density	8.25 g/cm ³	0.298 lb/in ³
Electrical Resistivity at 20 °C	131 microhm • cm	788 ohm • Circ • mil/ft
Maximum Operating Temperature	300 °C	572 °F
Melting Point	1345 °C	2450 °F
Coefficient of Expansion	13.6 µm/m °C (20 – 100 °C)	7.41 x 10 ⁻⁶ in/in °F (70 – 212 °F)

RW 118 / RW 122 / RW 70 High Strength Hot Cutting Wires

RW 118 Properties		
Density	8.18 g/cm ³	0.296 lb/in ³
Electrical Resistivity at 20 °C	118 microhm • cm	710 ohm • Circ • mil/ft
Maximum Operating Temperature	300 °C	572 °F
Melting Point	1370 °C	2500 °F
Coefficient of Expansion	12.7 µm/m °C (20 – 100 °C)	7.1 x 10 ⁻⁶ in/in °F (70 – 212 °F)

RW 122 Properties		
Density	8.28 g/cm ³	0.299 lb/in ³
Electrical Resistivity at 20 °C	122 microhm • cm	734 ohm • Circ • mil/ft
Maximum Operating Temperature	300 °C	572 °F
Melting Point	1430 °C	2600 °F
Coefficient of Expansion	12.6 µm/m °C (20 – 100 °C)	7 x 10 ⁻⁶ in/in °F (70 – 212 °F)

RW 70 Properties		
Density	8.00 g/cm ³	0.289 lb/in ³
Electrical Resistivity at 20 °C	70 microhm • cm	421 ohm • Circ • mil/ft
Maximum Operating Temperature	300 °C	572 °F
Melting Point	1375 °C	2500 °F
Coefficient of Expansion	17.6 µm/m °C (20 – 100 °C)	9.8 x 10 ⁻⁶ in/in °F (70 – 212 °F)

Alloy designation/specification summary

It may not be possible to fully release wire to some of the below specifications.
Please contact us for further information.

Glossary of terms

Cold drawn

Reducing the cross sectional area of a round wire diameter at ambient temperature.

Cold drawn - spring temper

A specific amount of reduction in cross sectional area to achieve standard spring temper condition. Not a standard condition for all alloys.

Cold drawn - No. 1 temper

A specific amount of reduction in cross sectional area to achieve standard No. 1 temper condition. Less than that of spring temper and not a standard condition for all alloys.

Cold drawn - special temper

A specific amount of reduction in cross sectional area to achieve customer required mechanical properties different to spring temper or No.1 temper.

Hard drawn

An amount of reduction in cross sectional area to increase mechanical properties to no defined standard.

Cold rolled flat wire

Round wire passed through top & bottom rollers at ambient temperature, resulting in naturally radiused edges.

Cold rolled section

Round wire rolled on four or more surfaces at ambient temperature, to control width and thickness.

Coated

Surface coated with a dry lubricant (soap), generally applied to aid customers during auto coiling.

Clean

No surface coating applied onto the wire.

Annealed

Softened by heat treatment.

Age hardening

Increasing mechanical properties with heat treatment, usually on finished components.

Stress relieve

Heat treatment process carried out on finished components to remove internal stresses induced by forming. Not intended to effect mechanical properties.

Heat treatment - after forming

Standard heat treatments for finished components are stated in our tables as a guide only and resulting mechanical properties are typical values. Various mechanical properties are achievable through a combination of cold working and heat treatment, please contact us to discuss your specific requirements. We can carry out capability tests on samples to demonstrate our products ability to meet your specification after final heat treatment.

Tensile strength

The tensile strength ranges given are typical for each alloy for the specified standard condition of supply. Please be aware that as we manufacture these materials, tensile strength can be altered to suit customer requirements.

Please contact us to discuss if different mechanical properties are required.

To the best of our knowledge, the information included in this literature is correct at the time of going to print. Due to continuous development, AWI reserve the right to change specifications without prior notice.
